[•] All specifications are subject to change without notice.

[•] Conformity to RoHS Directive: This means that, in conformity with EU Directive 2002/95/EC, lead, cadmium, mercury, hexavalent chromium, and specific bromine-based flame retardants, PBB and PBDE, have not been used, except for exempted applications.

SMD Inductors(Coils) For Power Line(Multilayer, Magnetic Shielded)

Conformity to RoHS Directive

MLZ Series MLZ1005W

The MLZ Series is a new line of multilayer choke coils for decoupling with the industry's best DC superimposition characteristics and lowest DC resistance*. TDK has developed this coil using its proprietary ferrite material technique and dense electrodes.

The MLZ Series exerts an excellent effect mainly on the decoupling of power circuits. It also exerts an effect on audio lines because of its low DC resistance.

The MLZ1005 series is now available in addition to the MLZ1608/2012 series

* The MLZ Series was regarded as having the industry's best DC superimposition characteristics and lowest DC resistance according to research conducted in September 2010.

FEATURES

- MLZ10005 series products have the best DC superimposition characteristics in the industry.
- Magnetically sealed configuration allowing for high-density mounting.
- Does not contain lead and is compatible with lead-free soldering.
- It is a product conforming to RoHS directive.

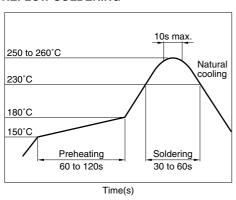

APPLICATIONS

Modules such as digital cellular phone and camera module, Netbooks, note PCs, DSCs, DVCs, video games, portable memory audio devices, navigation systems, PNDs, TVs, W-LANs, solid state drives

- Before soldering, be sure to preheat components.
 The preheating temperature should be set so that the temperature difference between the solder temperature and product temperature does not exceed 150°C.
- After mounting components onto the printed circuit board, do not apply stress through board bending or mishandling.
- The inductance value may change due to magnetic saturation if the current exceeds the rated maximum.
- · Do not expose the inductors to stray magnetic fields.
- Avoid static electricity discharge during handling.
- When hand soldering, apply the soldering iron to the printed circuit board only. Temperature of the iron tip should not exceed 350°C. Soldering time should not exceed 3 seconds.

- Conformity to RoHS Directive: This means that, in conformity with EU Directive 2002/95/EC, lead, cadmium, mercury, hexavalent chromium, and specific bromine-based flame retardants, PBB and PBDE, have not been used, except for exempted applications.
- Please contact our Sales office when your application is considered the following:
 The device's failure or malfunction may directly endanger human life (e.g. application for automobile/aircraft/medical/nuclear power devices, etc.)

SMD Inductors(Coils) For Power Line(Multilayer, Magnetic Shielded)

Conformity to RoHS Directive

MLZ Series MLZ1608

The MLZ Series is a line of multilayer choke coils for decoupling power circuits.

The MLZ1608-W Series, a line of the MLZ Series, has increased its DC superimposition characteristics by up to 225%* compared with existing products through the use of TDK's proprietary ferrite material technology.

Also available is the MLZ1608-L Series. This series has lowered its resistance by up to 40% compared with existing products through the adoption of a new ferrite material and dense electrodes. This series includes the E3 Series, which handles 1.0 to $10\mu H$, hence it is extremely useful in the power-supply design of low-voltage circuits.

FEATURES

- The W Series (IDC UP type) is a line of products that have achieved the industry's best* DC superimposition characteristics.
 * According to research conducted in August 2010.
- The L Series (Low-resistance type) has lowered its resistance by up to 40% compared with existing products.
- The D Series (High frequency type) is a line of decoupling coil products for high frequencies. It can handle higher noise frequencies.

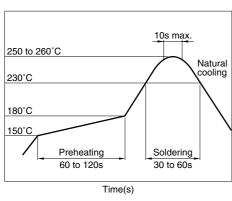

APPLICATIONS

Modules such as digital cellular phone and camera module, Netbooks, note PCs, DSCs, DVCs, video games, portable memory audio devices, navigation systems, PNDs, TVs, W-LANs, solid state drives

愛TDK

SMD Inductors(Coils) For Power Line(Multilayer, Magnetic Shielded)

Conformity to RoHS Directive

MLZ Series MLZ2012-H

The MLZ-H Series includes multilayer choke coils for decoupling power circuits.

TDK developed ferrite material, which has improved DC superimposition characteristics, allowing for the rated current to be equivalent to the wound coil. The DC superimposition characteristics of this series have been improved by up to 250% over the MLZ-W Series, which previously was in the top class in the industry. In addition, low ohmic electrodes are used making it possible to be compatible with large currents equivalent to the wound coil.

FEATURES

- Improved by up to 250% for large currents over the MLZ-W Series, which was previously in the top class in the industry.
- Magnetically sealed configuration allowing for high-density mounting.
- Does not contain lead and is compatible with lead-free soldering.
- It is a product conforming to RoHS directive.

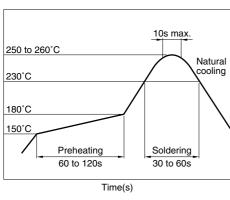

APPLICATIONS

Decoupling coil for power lines of DSCs, DVCs, PCs, TVs, etc.
